A B O U T   M E

I am in relentless pursuit of my passions. Since I picked up learning software development, I fell in love. I have always been a problem solver at heart and this field is a playground of problems to solve. There is so much to learn and so much room to grow. I am thrilled at the opportunity to be challenged and contribute to a team.

A C H I E V E M E N T S

US Air Force Veteran
I Served as a firefighter 2014-2017 at the USAF Academy in Colorado Springs, CO 2014-2017.

Served in Afghanistan
I Worked as a privately contracted firefighter at the US Embassy in Kabul, Afghanistan for the majority of 2018

Portfolio Website

I created a portfolio website with backend database functionality. The website features projects I have worked on, a blog page, and links to various social media. Skills utilized include:

- Python
- Django
- URL Routing
- MySQL

Password Generator

I created a password generator website that produced a random password. The user could choose the length of the password as well as whether capital letters, special symbols, or numbers would be included. Skills utilized include

- Python
- Git
- Bootstrap
- JavaScript

To-do List Website

I created a to-do list manager website where users can make an account, log in, create, read, update and delete. The website also features queries and filters. Skills utilized include:

- Error Handling
- User Authentication
